**DETAILED ACTION*****Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a method of controlling self-renewal of stem cells.

Group II, claim(s) 10-18, drawn to a composition of matter.

Group III, claim(s) 19-22, drawn to a method of assaying the effect of a candidate compound on stem cells' ability to self-renew.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 10, at least, is anticipated by Franklin et al (Genes & Dev, 1998). Franklin et al produce a strain of p18<sup>-/-</sup> mice (See Franklin et al, Pg. 2900, Materials and Methods); these homozygous mutant mice necessarily comprise stem cells which are substantially free of intracellular p18. Absent a further definition of 'human compatible', the mouse stem cells are considered to be human-compatible, and thus anticipate the subject matter of claim 10. Consequently, the special technical feature which is shared by Inventive Groups I-III (considered to be a stem cell population which is substantially free of p18), does not provide a contribution over the art, and thus unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
